PROFILE SUMMARY

A computer science graduate with practical experience in reinforcement learning, data routing, and wireless sensor network optimization. Passionate about network-based solutions and cybersecurity, I am seeking an opportunity to apply and develop my technical and research skills in a dynamic environment.

EDUCATION

2018 - 2025
UNIVERSITY OF BLIDA
(UNIVERSITÉ DE BLIDA 1)
• Master's in Computer Science
**SPECIALIZATION: SYSTEM
INFORMATIQUE ET RÉSEAU**

WORK EXPERIENCE

IT Intern - Entreprise de Viabilisation de Sidi Moussa
July - August 2022

- Learned basic hardware maintenance, including computer disassembly and troubleshooting.
- Installed and configured Windows operating systems on client machines.
- Gained hands-on experience with Microsoft Office tools: Word, Excel, PowerPoint.
- Worked with Windows Server: protocols, Active Directory (AD), and basic network configuration.

SKILLS

- Programming: Python, Java
- AI/ML: TensorFlow, Reinforcement Learning (A3C, DQN)
- Tools: Linux, VS Code
- Networking: WSN, Energy Optimization, Routing Protocols
- Team Leader at CDEC club in Cyber Security

Master's Thesis - University of Blida
2024 - 2025

- Title: "Reinforcement Learning-based Approach for WSN Energy and Latency Optimization"
- Designed and implemented an A3C (Asynchronous Actor-Critic) algorithm to optimize energy consumption and reduce latency in Wireless Sensor Networks (WSN).
- -Developed simulations using Python and [mention tool if used, e.g., NS2, TensorFlow, etc.].
- -Compared the proposed model with traditional routing techniques and metaheuristic algorithms.
- - Focused on balancing energy efficiency and data transmission delay.

Master's Graduation Project - University of Blida
2022

- Title: "A Web Application for Archive Management Using Python and Flask"
- - I developed a web-based archive management system as part of my graduation project.
- - It was built using the Python framework and Flask for backend logic and routing.
- - I designed a user-friendly interface using HTML, CSS, and basic JavaScript for uploading, searching, and organizing files.
- - I integrated a SQLite database to manage stored files and metadata.
- - I focused on modularity, code clarity, and ease of deployment.

LANGUAGES

- Arabic: Native / Excellent
- English: Intermediate
- French: Intermediate

CERTIFICAT

Cybersecurity Operations - Self-study

2023 - Present

- Gained understanding of threat detection, incident response, and secure operations.
- Explored concepts like malware analysis and penetration testing.

Networks Fundamentals - University of Khartoum (Online Course)

- Covered OSI model, routing basics, IP addressing, and switching.
- Practical exposure to networking simulations.

Python Programming (Basics) - University of Khartoum (Online Course)

- Learned Python syntax, variables, loops, and functions.
- Completed small assignments for hands-on practice.

Huawei ICT Competition - National Finalist (Algeria)

2024

- Qualified for the national stage after completing HCIA curriculum:
 - Datacom
 - Security
 - Wireless
- Covered all modules without sitting for the official certification.

Cisco CCNA (200-301) - Self-Study

- Studied switching, routing, subnetting, VLANs, and network protocols.
- Practiced with Packet Tracer and real-world labs.

CompTIA (Self-Study)

- A+ - Computer hardware, OS installation, and maintenance
- Network+ - IP addressing, protocols, ports, and security basics
- Malware Analysis - Identifying malicious behavior and tools for detection
