EXPERIENCE

Lead AI Engineer – Wisdomise (Multinational FinTech)

Dec 2021 – Jul 2025, Dubai

- Joined as an early member and led an 8-person tech team to deliver production-grade LLM and ML solutions for crypto finance.
- Spearheaded sentiment analysis, coin scoring, and forecasting tools using social, technical, and on-chain data.
- Directed the development of a RAG-based crypto assistant with interactive document parsing and live search features.
- Acted as Technical Product Manager, aligning cross-functional teams with business and data strategy goals.

Chapter Lead of Data science team- Balad Map

May 2020 – Feb 2022 ,Tehran

- Led a 10-person data science chapter; drove hiring, and mentorship, and designed a career ladder framework.
- Collaborated closely with product and engineering teams to align models with business needs.
- Built the first in-house traffic prediction system without crawling external sources.
- Initiated road bump detection via clustering and real-time user reports.
- Boosted map search relevance by 50% using Bayesian ranking methods.
- Developed change-point detection for real-time anomaly spotting (e.g., accidents, weather).

ML Engineer - ESI

Oct 2017 – Jan 2020, Tehran

- Led a 3-person team and performed data analytics for urban mobility.
- Analyzed Tehran's OD matrix and modeled district traffic using Gaussian processes.

Product Manager(shareholder) at HerminaTech

Aug 2018 – Jan 2020, Tehran

- Designed and managed a full-cycle B2B cloud-based hotel management and reservation service.
- Gained solid product management experience with strong cross-team communication skills.

EDUCATION

PhD, Artificial Intelligence – Sharif Univ. of Tech. 2019–25

MSc, Artificial Intelligence – Sharif Univ. of Tech. 2017–19

BSc, Digital Systems – Sharif Univ. of Tech. 2013–17

SUMMARY

AI Engineer with 8+ years of experience in machine learning, NLP, and AI product development, with a strong track record in applying LLMs and ML techniques across domains like crypto, mapping, and logistics. Proven ability to lead data-driven product development, align technical teams, and contribute to business goals—shaped by hands-on experience in both startups and complex AI systems.

Skilled in bridging technical and business teams through clear communication and shared objectives. Passionate about continuous learning and adaptability, with a focus on using data and AI not as ends, but as tools to solve real-world problems. Experienced in tackling human-centered challenges and maintaining technical currency through active learning and collaboration with local AI institutions.

WORKED WITH

- **Languages & Libraries:** Python, SQL, PySpark, NumPy, pandas, scikit-learn, PyTorch, TensorFlow, Hugging Face
- **LLMs & NLP:** OpenAI APIs (GPTs), Hugging Face Transformers, RAG, LangChain, Vector DBs (e.g., FAISS), Multimodal models, CLIP, Open Source LLMs (e.g., LLaMA, Mistral, Phi), Ollama, Vllm, TGI
- **Data Tools:** Apache Airflow, Metabase, Elasticsearch (basic), Docker
- **Frameworks & Backend:** Django (basic), FastAPI
- **MLOps & Infra:** ML pipeline design, monitoring (basic), MLflow, Grafana / Prometheus (basic)
- **Analytics & Visualization:** A/B testing, experiment tracking, matplotlib, seaborn

RECOMMENDATIONS

You can find professional recommendations on my [LinkedIn profile](#) or reach out to my colleagues directly.

For brevity, some earlier roles and collaborations (e.g., consulting or teaching engagements with academic and industry partners) are not listed here.
